

PHASE 4

API Contract

Endpoints, request models and normalized response structure

SMARTPOCKET AI • SMART BUDGET AND RECOMMENDATION ASSISTANT

1. API Contract

Method	Route	Auth	Purpose
GET	/	No	Service health response
POST	/register	No	Create an account and return an authenticated session
POST	/login	No	Authenticate and issue a token
GET	/session-info	Yes	Return current session information
POST	/recommend/home	Yes	Generate a home interior plan
POST	/recommend/party	Yes	Generate a party plan and venue suggestions
POST	/recommend/jewelry	Yes	Generate jewelry suggestions with optional image analysis
POST	/history	Yes	Save a normalized plan
GET	/history	Yes	List the current user's plans
DELETE	/history/{id}	Yes	Delete one owned history entry
DELETE	/history	Yes	Clear the current user's history

1.1 Home Planner Request

```
{
  "totalBudget": 150000,
  "rooms": {"living": true, "kitchen": false, "bedroom": true},
  "lights": 8,
  "fans": 3,
  "furniture": 4,
  "diningTables": 1,
  "additional": "modern minimalist look"
}
```

1.2 Normalized Response Shape

```
{
  "total_budget": 150000,
  "spent": 142300,
  "remaining_budget": 7700,
  "budget_breakdown": [
    {
      "label": "Lighting",
      "total_cost": 9600,
      "percentage_of_budget": 6.4,
      "items": [
        {
          "name": "LED panel light", "quantity": 8,
          "estimated_price": 9600, "shopping_links": []
        }
      ]
    }
  ],
  "additional_suggestions": []
}
```

Contract rule

The frontend should render only the validated response returned by the backend. Raw model text should never be inserted directly into the page.

Error Responses

Error status codes and expected client behavior are described in the separate AI Integration and Budget Safety document.
